

CITY OF SPRINGFIELD
INTER-OFFICE MEMORANDUM

ATTENTION OF FILE

DATE 11-30-88

DEPARTMENT _____

Subject: K-Mart

On November 28, 1988 I received a call from Lee Schaefer of Sunbelt Environmental Management asking if the City would accept approximately 500 gallons of water from an underground waste oil tank. He indicated the oil & grease concentration was 0.48 ppm.

On November 30, 1988 at 1:00 p.m. Steve Short and myself contacted Mr. Schaefer at the K-Mart located at 644 W. Sunshine. During our conversation the concentration of oil & grease described by Mr. Schaefer changed to 0.48%. I informed him that the City could not take the water because it exceeded the Chapter 30 limitations for oil & grease. The K-Mart manager indicated that their waste oil hauler (Radium Oil) would not take it either because it had too much water in it.

The water was pumped out by Ross Spencer and placed in 55 gallon drums to be disposed of by Sunbelt as a special waste.
